*Join our winning team!*

Are you ready to make your mark on our journey towards a future fuelled on nothing but renewable energy? Do you want to bring your A-game and kickstart your career in an international company? Then we offer you the opportunity to become one of the first graduates in Eurowind Energy – ever!

Eurowind Energy is a leading developer and operator of wind, solar and hybrid projects. We have more than 230 employees across 13 European countries and the US, and we are growing in numbers every month.

The Eurowind Energy Graduate Program is a 2-year international career journey with three rotations including one international rotation.

During the program, you will gain a deep understanding of our company, our business and our company values. You will be included in and drive global projects and well as build a strong network of professional and dedicated colleagues.

**Eurowind Energy™**

## About us

**The wind is in our blood. Maybe that's why we're always on the move. Why we're always pushing forward to realize our vision of the future: a future fuelled on nothing but renewable energy. Why? Because nothing will grow from standing still.**

**You see – we're first and foremost wind-farm project developers and owners. The business of energy is our playground – wind as well as solar. But we're also in this business for the development of the industry. For the new technologies. For the refinement of future power. For growth. And we keep moving – ourselves and the industry.**

You have the chance to choose between three different tracks depending on your future dreams.

[graduate.eurowindenergy.com](https://graduate.eurowindenergy.com)

The program could look like one of the below mentioned tracks depending on your future career dreams, but nothing is set in stone – for the right candidates, we will set-up the right program.

### **Finance**

- Group Finance – Treasury
- Asset Management Finance
- Corporate Finance

### **Development**

- Project Development in Denmark
- EPC (Engineering, Procurement & Construction)
- Asset Management

### **Strategic business**

- Power to X development
- Development – located at our HQ
- Development – located in one of our international offices

During your full-time employment, you will experience

- To rotate among different departments and become a central part of projects that will build your experience and knowledge.
- A steep learning curve in a renewable company where the best argument wins.
- To meet and interact with other graduates and gain a close network with many colleagues in an international company.

***“One of the things I value the most here at Eurowind Energy is that my opinion matters. I might be the youngest in our team, but my opinion is just as important as my colleagues. At Eurowind Energy I truly experience an outstanding teamspirit throughout the entire organization.”***

**– Nikolaj Dalum**, Project Assistant  
Bachelor in Technology Management and Marine Engineering
